OBJECTIVE

Motivated and detail-oriented software engineer with hands-on experience as a full-stack web development intern. Seeking an entry-level software engineering position to contribute to scalable, high-impact applications while leveraging skills in JavaScript, Node.js, react, and MongoDB. Passionate about solving real-world problems, collaborating in Agile/SCRUM teams, and continuously learning new technologies.

PROFESSIONAL EXPERIENCE

Software Engineering Intern (Web Development)

One Firefly

June 2025 - Present, Coral Springs, FL

- Designed, developed, and maintained client websites using CMS platforms including WordPress and Joomla, ensuring responsive layouts, accessibility, and modern UI/UX standards.
- Implemented custom site functionality using HTML, CSS, JavaScript, and CMS plugins; resolved cross-browser issues and optimized for performance across multiple environments.
- Participated in Agile and SCRUM workflows, using Slack, Trello, and internal documentation tools to coordinate with cross-functional teams and meet delivery deadlines.
- Optimized website performance and structure using SEO best practices, resulting in a 40% improvement in page load speed, a 25% increase in organic search traffic, and higher user engagement metrics.
- Conducted QA testing, content updates, and site migrations to ensure high availability and minimal downtime.

EDUCATION

B.S. in Computer Science

Florida State University • Tallahassee, FL • GPA 3.5/4.00

• December 2025

Projects (located in the GitHub link listed above)

Task Manager Website

Summer 2025

Full Stack Developer

- Developed a full-stack task manager implementing CRUD operations with real-time user authentication and personalized task storage using Node.js and MongoDB, ensuring secure, scalable user data management.
- Integrated external APIs like FullCalendar and Flatpickr to provide dynamic task scheduling and intuitive date picking.
- Developed core features including task creation, updating, searching, and real-time auto-saving notepad.
- Implemented a notification system for upcoming task reminders, leveraging RESTful API endpoints to ensure seamless frontend-backend communication.

E-Commerce Website

Summer 2024

Lead Programmer

- Designed and built a responsive, user-friendly frontend using HTML, CSS, and JavaScript, ensuring seamless navigation across devices.
- Developed backend server logic with Node.js, handling product data and order processing securely.
- Implemented client-server communication via RESTful API endpoints, enabling dynamic content updates.
- Integrated the Stripe API to implement a secure, reliable checkout and payment system, enabling smooth transactions and real-time payment confirmation.

SKILLS

Programming Languages: Java, C/C++, Python

Web Development: HTML, CSS, JavaScript, React.js

Backend & Databases: Node.js, Express.js, MongoDB, SQL, MySQL

Tools & Platforms: Git, Docker, Agile methodologies, Trello, SCRUM, CMS (WordPress, Joomla)
